**DATE:** June 13, 2006

**SUBJECT:** Letter Transmitting Plans and Specifications for the Construction of Burton Drive, Cambria Slope Stabilization System, County Contract No. 245R12B560, for Board Approval and Advertisement for Construction Bids

## Recommendation

It is our recommendation that the plans and specifications for the subject contract be approved and that the contract be advertised for construction bids. The recommended bid opening date is Thursday, July 13, 2006.

## Discussion

Burton Drive is a major collector roadway connecting the Cambria East Village with Route 1 and residential neighborhoods to the south. Over the past three years, there have been on-going rock slides on the sustained grade on Burton Drive directly across from the Village Road intersection. The slope is approximately 60 feet tall and composed of sandstone which fractures and falls onto the roadway. The road has been closed for extended periods due to the rock slides and poses a risk to travelers along the route as well as reducing emergency vehicle response time when the road is closed. Moreover, our field crews have had to expend a great deal of time and money to clean-up and maintain the slope over the past three winters.

The proposed contract would cover the slope with rockfall fencing system which is anchored into the slope. The system would control debris coming down the slope to prevent the material from coming onto the roadway. Debris would collect at the base of the slope which can be effectively removed from time to time by our crews. The system is similar to those used on the Cuesta Grade project by Caltrans.

Work would be conducted this fall in order to avoid another winter season of slides.

### **Other Agency Involvement/Impact**

There is no outside funding source for this project. Staff has consulted with Caltrans regarding the use and installation of this material in order to achieve the desired success.

### **Financial Considerations**

This is a Road Fund maintenance project currently budgeted through design at \$20,000. Award of the construction project is expected in July Fiscal Year 2006/07. Funding for the estimated \$379,000 cost of construction will come from the Fiscal Year 2006/07 Road Maintenance Budget. No Budget Adjustment will be necessary as this was anticipated in planning the current and future Road Maintenance Budget.

This project will help prevent future road closures, clean up and debris removal from this area and thus allow maintenance crews to continue with normal maintenance as planned each year.

Please see Exhibit A for an estimated cost breakdown.

### **Results**

Approval of the recommended action will result in this project being advertised for construction bids.
